Review of Previous Call Summary

- The 05.18.2016 call summary was approved as presented

Profile 1.0 draft review

- A line-by-line reading was conducted to identify and address:
 - Specific issues to be addressed prior to 1.0 release for public comment, e.g., defining the center-of-mass activation
 - Specific “Actor” responsibilities within Table 1
 - Post-processing vs. Image Data Reconstruction specifics needed
 - Areas for future development after 1.0 release
- The Claim is to be re-written
- Dr. Voyvodic to send comments to Dr. Mohamed
- When final updates are made, the Profile is to undergo an internal fMRI BC review/comment period
- Once the internal review is completed, the next step is to distribute the Profile for public comment (to the entire QIBA cross-modality membership)
- Unresolved issues can be addressed in the next version of the fMRI Profile (v2.0)

Other Business

- The fMRI Bias TF call scheduled for June 7 was moved to a different time slot, due to a conflicting mandatory RSNA staff meeting
