

AIUM/QIBA
Ultrasound Volume Blood Flow
Biomarker

MINUTES 2019-12-04

Attendance:

J. Jago, O. Kripfgans, M. Lockhart, M. Robbin, J. Rubin, R. Tadross, M. Yoshitaka

I. Overview

- Status of QIBA project
 - Manuscript under review
 - No current project work
 - No monetary support from QIBA/NIBIB
- Future support
 - General QIBA type investigations may be questionable. Outreach to NIH to inquire about focus of NIBIB support.
 - Specific applications are still an option and are used. Examples include carotid, AV fistulas and umbilical flow.

II. Vendor specific approaches

- QIBA showed possibility of implementation on a range of commercial scanners
- Continued work on vendor sponsored investigations
