QIBA Early Stage Lung Cancer Profile Writing Group Details

- The main goals for the call were:
 - Establish a name for the group
 - Key terms in the name may include: screening, follow-up and characterization of growth. Additional discussion is required.
 - Development of a charge:
 - The group came to the decision to begin working on a Profile, with a Protocol to follow.
 - Dr. Mulshine suggested distributing the Advanced Disease Profile as a Word Document as a starting point.
 - Identification of a Profile Editor.
 - Group members who were invited to participate but not present on the t-con will be invited to the next t-con but will be asked to confirm their interest in participating if they do not join the call for a second time.
 - A timeline needs to be established for the Profile tasks.

Next steps

- Establish a standing bi-weekly t-con schedule.
 - Suggestions for group name to continue via e-mail.
