## MINUTES 2017-03-06

### Attendance:

C. Baiu, P. Carson, Todd Erpelding, B. Fowlkes, J. Gao, A. Hall, T. Hall, M. Holland, O. Kripfgans, M. Lockhard, R. Managuli, K. Minton, S. Pinter, J. Rubin, R. Tadross, M. Trew

### I. Phantom production

- Phantom received, testing at UM first
- Paul Carson asked about the availability of the second phantom (ordered through AAPM). Estimated arrival time ~1 month (Cristel Baiu).

### II. Phantom study

- First non-UM phantom study at University of Washington, March 6<sup>th</sup> to 8<sup>th</sup>.
- Instructions were sent ahead of testing at site
- Lab was provided with Epiq 7 scanner and trained by Philips
- Amend protocol to instruct the user to:
  - include background voxels (1 cm margin surrounding lumen)
  - choose curved path for depth study
  - time to capture does not influence measurement
- 

### III. Next meeting topics

- Handling of confidential information
- Non-disclosure agreements versus Good faith
- Data and knowledge flow
