Julie Lisiecki

Agenda: Presentation by Drs. Zhao and Petrick on: --- CT Tumor Volume Change: Lung Phantom and *in vivo* Lung Tumor > Liver Phantom

Discussion:

- Development and proposed analysis of the liver phantom discussed:
 - Challenges in the measurement of liver lesions: low contrast and hyper, hypo, and heterogeneous
 - Unknown effects of imaging and measurement techniques on the volumetry of liver lesions
 - Phantom design and imaging protocols
 - Lesion volume measurement using two non-commercial sizing tools
 - CU algorithm: based on a marker-controlled watershed transformation
 - FDA algorithm: matched-filter based volume estimator
 - Plans to expand beyond GE and Siemens to engage additional scanner vendors
 - Preliminary statistical analysis (similar to the work of QIBA 3A)
 - Timeline for completion – an end date of April 2015 is estimated for completion of the project, including statistical analysis and potential RSNA abstract(s)

Action items:

- Committee is asked to consider future directions for the group, to be discussed at the f2f meeting at RSNA 2014
- Remaining tasks related to the Profile:
 - Review performance requirements in Section 3, particularly for measurement software
 - Assessment procedures:
 - An ad-hoc call is being planned with Mr. Buckler and Drs. Kim and Obuchowski.
 - Volunteers who want to discuss the proposed bias and precision numbers from Table 1 in Section 2 of the Profile the Image QA activity on a separate call to email RSNA staff: jlisiecki@rsna.org

Next Call: November 17th – Full TC: Drs. Samei/Sahiner presentation

NOVEMBER

- November 10th – Veteran's Day is officially on Tuesday, November 11th
