Review of the QIBA Assessment Procedure Guidance

- Located on the QIBA Wiki at: http://qibawiki.rsna.org/index.php/Assessment_Procedure_Guidance
- The original purpose of this document was for testing statistical assumptions underlying the Claim and for testing the composite performance of a site to compare it against the Claim
- Resumed review with “Step 1 – Procedure for testing the assumption” within Section 2: “Process for Testing the Assumption”
- Discussion on whether this document should contain guidance on how to write a thorough assessment for the Profile as well
- “Composite Performance” of a site to compare against the Profile claim discussed, e.g. how could sites attempt to measure their own performance?
- Definition for good test-retest datasets needed, to also address exclusion criteria for poor data
