

QIBA CT Small Lung Nodule (SLN) Biomarker Ctte (BC) Call

16 January 2018 at 1 PM CT

Call Summary

In attendance:			RSNA:
<i>David S. Gierada, MD (Co-Chair)</i>	Charles Fenimore, PhD	Nancy Obuchowski, PhD	Joe Koudelik
<i>James L. Mulshine, MD (Co-Chair)</i>	Alexander Guimaraes, MD, PhD	Kevin O'Donnell, MASc	Julie Lisiecki
Rick Avila, MS	Philipp Hoelzer, PhD	Mario Silva, MD	
Kirsten Boedeker, PhD	Edward Jackson, PhD	Raja Subramaniam, PhD	
Andrew Buckler, MS			

Moderator: Dr. Mulshine

Addressing Comments (Mr. Avila):

- BC profile editors are working to fill in values to prepare for the field testing phase
- Some of the issues discussed were as follows:
 - Duplicate requirements for sections 3.10.2 and 3.7.2
 - Image data acquisition updates for sections 3.4.2 and 4.1
 - Standardization of the lesion measurement from <12mm to <10mm throughout
 - Updating reference links to be completed before pursuing field testing
 - Acknowledgement that “planning future studies to acquire more supporting data” was an acceptable response to technology gaps identified during Public Comment
 - “NO” votes are not to halt Profile progress once a BC/CC majority “YES” vote is obtained. If the vote passes, the Profile progresses to the next stage, and remaining open comments will be documented and resolved, where possible, by the BC.
- An updated Profile and feedback resolution spreadsheet will be posted to the QIBA Wiki for reference once ready
- Suggestions for refinements and improvements are always welcome

Volunteers needed:

- Volunteers are needed for a scanner vendor / site testing which will include DOE scanning and the analysis process
- Volunteers are asked to please contact Mr. [Avila](#) or any of the co-chairs: Drs. [Armato](#), [Gierada](#) and [Mulshine](#)

Next call: TBD by doodle poll

Calls will be scheduled bimonthly in the near future and will eventually be scheduled monthly
