

QIBA Lung Nodule Assessment in CT Screening Task Force

Staff notes

30 January 2015 at 3 PM CT {Friday, special time}

In attendance:

Samuel G. Armato, III, PhD (Co-Chair)

James L. Mulshine, MD (Co-Chair)

Dominic Crotty, PhD

Matthew Fuld, PhD

Kavita Garg, MD

Nancy Obuchowski, PhD

Ehsan Samei, MD

Jenifer Siegelman, MD

Daniel Sullivan, MD

RSNA:

Joe Koudelik

Julie Lisiecki

- Dr. Petrick is currently reviewing the Profile claim language drafted by Dr. Gierada; feedback to be incorporated
- Drs. Armato and Siegelman to extract *two* checklists, focusing on tasks from:
 1. The claim language
 2. The entire Profile document
- Dr. Mulshine mentioned that the aspect ratio for the claim may need some re-wording
 - Statistical language appeared OK to Dr. Obuchowski
 - Dr. Mulshine to draft revised aspect ratio wording, focusing on variance
- Dr. Armato captured more detailed technical notes on the call for reference.

Ongoing Action items:

- Dr. Gierada will be working on claim language (using the current template) and plans to get a draft out for review in the near future, using some of Mr. Avila's groundwork data and Dr. Petrick's feedback
- Aim to have a draft Profile out for Task Force review soon.

Next call: TBD by co-chairs {on a Thursday at 3 pm CT}
