Daniel Sullivan, MD
Ying Tang, PhD

RSNA:

Joe Koudelik
Julie Lisiecki

Profile Updates

- Dr. Obuchowski has been reviewing the claim for CT Volumetry; she plans to join the calls for the Claim Formulation Work Group discussions
- Some trimming of the Profile is under consideration to make the document more user-friendly
- Profile to remain self-contained, i.e., minimal links to outside content, appendices, etc. in efforts to avoid revision control issues
- The Profile is approaching the technical confirmation phase – some considerations are needed:
 - Finalization of numbers for the clinical target
 - Assurance that groundwork projects and future proposed projects are feeding the Profile
 - Identify what criteria is needed to claim “Technically Confirmed Version” of the Profile
- The group plans to release another publicly reviewed version of the Profile *with* Metrology input and then move to the technically confirmed stage
- Dr. Goldmacher plans to set a timeline in place for completion of the Profile on the 6/30 Technical Committee call

Collaboration and Working Groups

- RSNA Staff to send a reminder to Technical Committee members inviting volunteers to join the Claim Formulation Work Group
 - Calls for the Claim Formulation Work Group will likely begin in July alternating with the Tech Cttee on Mondays
- Inviting Drs. Jackson and Kinahan to discuss their perspectives re: the technical confirmation phase for the DCE-MRI and FDG-PET Profiles was requested by Dr. Goldmacher

Action Item: Those interested in volunteering for the **Claim Formulation Work Group** should email RSNA staff at jlisiecki@rsna.org

Proposed next calls for QIBA CT Volumetry:

- Monday, **June 30th** at 11 am CT – **Technical Committee** – *Discussion of Next Steps/ Timeline for the Profile*
