Profile – Public Comment – Phase I underway

- Tech committee members are encouraged to add their comments and suggestions for improvement using the form on the QIBA wiki: http://qibawiki.rsna.org/index.php?title=Work_Product_for_Review

Action Items:

1. Vote for public comment extension to be put to the Modality Voting group for FDG-PET – to extend for 45 days
 - a. There was discussion and consensus that the FDG-PET Profile is mature enough in the public comment phase to be announced as ready for comment to appropriate organizations as well as individuals. For this reason, an extended public comment phase will be considered.
2. *RSNA staff to distribute the following to the FDG- PET technical committee:*
 - a. Comprehensive list used for initial public comment phase for members to review and suggest individual additions
 - b. Dissemination list to organizations, societies, etc., for members to review and provide suggestions/ contact information for any other organizations not already represented
 - c. Survey to identify next FDG-PET Profile topic, with the following options:
 - i. Neuro – FDG-PET
 - ii. Amyloid – FDG-PET
 - iii. SPECT imaging
 - iv. Other – option to provide additional topic suggestions for a Profile
3. Items to be updated on the QIBA Wiki:
 - a. Link to Profile Public Comment Wiki page to be added to FDG-PET Tech Ctte page for easy reference
 - b. Comments that have already been provided to be posted after contacting submitters
4. Dr. Satoshi Minoshima will be a guest for the Friday, March 15th 9 am tech committee call to address MEDCAC
5. Consideration to be given to inviting QIBA FDA members to review Profile, even if not part of FDG-PET Tech Ctte
