Instructions on how to upload the data

Go to www.qi-bench.org
Click on "Scientist"
Click on "Access"

Login as the user 3A-Participant:

Login: info@bbmsc.com
Password: secondchallenge

Click on "My folders"

Now you are in the 3A-Participant's private folder

Click to open the ParticipantData directory

Click on "Create a new Folder" and create a folder with the **name of your anonymous user ID**

Open your folder and click on "Upload here"

Here you'll find 4 tabs: "Simple", "Files over 2GB", "Folders", "Links".
Tar and zip your directories and use the Simple or Files over 2GB tabs. Don't use "Folders" tab as it seems to be buggy.

Note: If you have large amount of data and have trouble uploading it on QI-Bench I can provide a python script for you to use. If you prefer using the script email me at Jovanna.danagoulian@bbmsc.com.
