

QIBA CT Volumetry Field Test Design (Task Force) Call #3 –
Topic: Field Test Data Harvesting
23 March 2015 at 11 AM CT
Notes provided by Dr. Goldmacher

In attendance:

Samuel G. Armato, III, PhD (Co-Chair)

Gregory V. Goldmacher, MD, PhD, (Co-Chair)

Lawrence Schwartz, MD (Co-Chair)

Maria Athellogou, PhD

Hubert Beaumont, PhD

Andrew Buckler, MS

Nancy Obuchowski, PhD

Jenifer Siegelman, MD, MPH

Daniel Sullivan, MD

RSNA:

Joe Koudelik

Julie Lisiecki

Discussion on 3/23/ 2015:

Initial plan is to have 16 cases sequestered, and 72 non-sequestered cases.

Question to resolve: when do we start sequestering data, and which cases to sequester?

Details of collection and access – need to work out with potential QIN collaborators.

Initial discussion of costs:

- Case collection
- Infrastructure
- Readers
- Statistical analysis

Topics that will be discussed next week (3/30/2015):

Broadly: site and subject considerations for the field test

- Repeat use of IV contrast in clinical trial on humans
- Inclusion and exclusion criteria
- Site eligibility requirements

The intent is to devote about 20 minutes to each portion of the discussion.
