**General Discussion Items**

- Rolling biomarker qualification approach discussed
- Profiles and Protocols needed to establish standards for Pharma
  - QIBA actively to develop recommendations to follow
- Multiple vs single context (interval growth in screening context, clinical care, clinical trials)
- Consider breaking Profile content into multiple documents; e.g.,
  - Screening/diagnosis
  - Clinical management
  - Clinical trials
- Tighter, narrower focus proposed; to use supporting data that already exists

**Next Steps**

- Mr Buckler to demo Claim mark-up on next authoring session and WIKI post for reference
- Next Small Pulmonary Mass Profile Authoring Session on May 9, 2011 at 11 am CDT
