Project PI: Kavita Garg, MD

Project Title: "Quantifying Variability in Measurement of Pulmonary Nodule (Solid, Part-solid and Ground Glass) Volume, Longest Diameter and CT Attenuation Resulting from Differences in Reconstruction Thickness, Reconstruction Plane, and Reconstruction Algorithm"

3-month Interim Report (September 20th, 2011)

1. Ongoing scheduled conference calls with collaborators to refine the study design
2. Phantom has been ordered, awaiting delivery
3. In the process of ordering synthetic part-solid nodules
